

A Plan to Succeed

CONTACT: Paul De Young
269-657-7874

- Prepare the office for electronic recordings and transactions by updating technology in the office without adding additional cost to taxpayers.
- This technology will accelerate the digitization of old records, ensuring their preservation and bring more documents into our system so that we have decades of records at the customer's fingertips.
- Invest the "technology fund" in cost-efficient technology.
- Make the office more convenient to its customers.
- Help ensure that the additional confidentiality of citizens is not compromised through human error.
- Prepare the office for the future so the office keeps pace with the customers it serves and stays competitive with the progress of neighboring counties
